Ari

The division of Signes,

Aries.

Cancer.

Libra.

Capricorne.

Taurus.

Leo.

Scorpius.

Aquarius.

Gemini.

Virgo.

Sagittarius.

Pisces.

Arc Mobill.

Arc fixe.

Arc comon.

The last halfe of *Libra*, and the first halfe of *Scorpius*, is called *Via combusta*, that is to saye in English, the burnt way.

Generall rules for Election concerning the Signes.

It is to be noted in all these Rules following that the day in the Kalender bee not marked with this (J.) for then the thinge that you enterprise

Concernyng the Signes.

ysse, can not take so good effect.

Good to set, sow, plant, or grasse: when the Moone is in *Taurus*, *Virgo*, *Capricorne*, and *Pisces*.

Good to stoppe: *Fluxes*, *Reumes*, and *Laxes*: the Moone beyng in *Taurus*, *Virgo*, and *Capricorne*.

Good to enter into Bathes: the Moone in *Cancer*, *Scorpius*, and *Pisces*.

Good to cut beeres, or shawe the beard in *Libra*, *Sagittary*, *Aquarius*, and *Pisces*.

Good to Hauke: the Moone in *Gemini*, *Libra*, and *Aquarius*.

Good to Hunt, in *Aries*, *Leo*, & *Sagittary*.

Good to Fish, in *Pisces*, and *Cancer*.

Good to beginne to builde: in *Taurus*, *Aquarius*, and the ende of *Scorpius*.

Good to set children to Schole, in *Gemini*, and *Virgo*.

Good to Bye and Sell: the firste parte of *Aries*, the seconde parte of *Taurus*, the fyfthe parte of *Gemini*, the first parte of *Libra*, and the seconde parte of *Pisces*.

Good to bye lande: the ende of *Scorpius*, & the first parte of *Capricorne*.

Good to bie Horse, Oxen, Kine, or any other cattell: the seconde part of *Scorpius*, and the last parte of *Sagittarius*.

a. v.

Good

Concernyng the Signes.

Good to go by lande, in Aries, Cancer, the laste parte of Virgo, the first parte of Libra, & the first parte of Sagittarius.

Good to goe by water: the firste parte of Taurus, al Cancer, the first part of Leo, the latter ende of Scorpius, and the seconde parte of Capricorne.

Good to go about matters of the Law: all Sagittary, and the ende of Aquarius.

The best time to bie any thing good chepe is when the Moone is in the beginnunge of Capricorne, untill she be in the ende of Gemini.

The best time to haue oz cut heere, oz to there sheper is when the Moone encreaseb to wardes the full.

The best time to reape Cozne, oz to cutte woode for to make timber, is at the wane of the Moone.

The best time to set Beanes and Peason is at the full of the Moone.

The best time to hier seruantes, is in Taurus, Gemini, the firste parte of Cancer, the middell and last part of Virgo, the first parte of Libra, the last half of Aquarius, & the firste parte of Pisces.

The best time to take iourney: is when the Moone is in a signe mobill, (excepte the laste halfe of Libra) but the fixe signes are very

For lettynge of blood

very ill to take Journey in.

Other Rules.

When the Moone is in a signe mobile: it is good to enterpryse thinges that we wolde make speede of and wolde haue shortly brought to pas.

When she is in a fire signe: good to enterpryse thinges that wee wolde haue longe to endure.

When she is in a common signe: good to do thinges that we wolde not haue longe to endure, and that we wolde wishe to be done againe.

The Moone beyng in the East angle at the beginning of any busines, is to bee abhorred as *Haly* saith.

In al thinges that you go about: beware chiefly of the change and full of the Moone, and next of the quarters.

Beware to take iourney by lande, or by water, or to dooe any notable thing, when the Moone is in *via combusta*: that is when she is in the last half of *Libra*, or the first half of *Scorpius*.

Beware to put on any new garmente, when the Moone is in *Leo*, or at the change

For lettynge of blood

oz full of the Moone.

The Moone beyng in *Cancer*, oz *Virgo*, it is very ill to marie (except that *Virgo* is good for widowes.) Also *Aries*, *Libra*, *Capricorne*, & *Aquary*, are nought to marrie.

Kninours oz Jewes that be tolde, when the Moone is in the beginning of *Scorpius*, oz *Capricorne*: are moſte commonly falſe.

Rules concernynge lettynge
of blood, and miniſtring of
Purgacions.

When the weatheer is extreme hot oz colde: it is not good to purge oz to let blood, except great neceſſitie both require.

No part of mannes bodie ought to be touched, with any instrument oz canterp, actual oz potenciall, when the Sunne oz Moone, oz the lord of that ſcendent, is in the ſame ſigne that governeth that part, oz that the moone be in the Eaſt angle. Take heed alſo, leſt the Lord of the eight houſe, be with the Moone, oz with the Lord of the Aſcendent. Or that the Moone, oz the Lord of the Aſcendente, be in the ſowerth oz eight houſe.

Alſo *Gemini*, *Leo*, the laſt halfe of *Libra*, and the firſt twelve degrees of *Scorpius*, with *Taurus*

and ministring of Purgacions.

rus, Virgo and Capricorne, are not good for lettyng of blood.

Also almost thre daies befoze the chaunge of the Moone, and twoo daies after, is not good to let blood: noz when the daie is marked thus: 3.

As touchyng Clifters, that bee not to strong. Also gentill and lenittive purgaciōs, maie be giuen at any tyme, *Satis longe a cibo*, without daunger. As the moste parte of the learned Physicians doe testifie, and I my self by daily practise and experience, doe finde it true.

But to take any strong purgacions: it is good to obserue mete and chosen daies. *Nisi morbi sint valde acuti, quia tunc (teste Hippocrate) medicari oportet eadem die, tardare enim in talibus malum est.*

Likewise, as touchyng lettynge of blood: if it be for the Pestilence, Obzessie, Pleuresie, Squinancie, *Prosyncho putrida*, for any stronge burning Ague, for inflamacion, or extreme paine: A manne maie not tary for a chosen daie, for the patiente maie dye in the meane space: but incōtinently with all spede he must be let blood, except he be very weake except also the Moone bee in the signe, that ruleth that parte of mannes bodie.

The lenitive medicines, that
may be given at any tyme,
without daunger, are
these following.

The Simples.

Cassia fistula.

Manna.

Tamarindi.

Myrobalani.

Rhabarbarum.

Sena.

Polypodium.

Epithymum.

Turbentyne of Venice.

Aloe, and socche libe.

The Compounds are these.

A Prognostication.

John Securis, to the gentle

Reader.

It is not possible for any mortall man, to write so exactly in any sciēce, but that in that matter, that he intreateth of; some thing maye be either reprehended, or corrected, or els amplified and set out in better forme and sorte, then it was at the first time. In consideration whereof, I haue for this yeare (although not very willingly, because I delight a great deale more to studie and exercise my selfe in mine owne profession, which is Physick) published and set forth a new Almanacke & Prognostication, made somewhat in more ample forme and stile, then was my last yeres Prognostication and Almanacke, *Quam*

autem bene, viderint alij me doctiores: a doctioribus enim.

To the Reader.

nim doceri non erubescit, I woulde gladiye
profit the common welth, as moch
as in me lieth, with that smale ta-
lent that is committed vnto me, &
wolde be sozte to hinder any man,
for mine owne peculiar profit sake.

Wherefore I woulde wishe thee
Gentle Reader, that although
all thinges be not here per-

fect and vnfallible, (*quia*

nemo perfectus nisi solus deus,

cuius verbum solum per-

fectum est & immus-

tabile) yet

neuer

thelesse thou wilt gently

accepte this my labour

and study, and take

all thinges ther.

in wel a worth.

Farewell.

¶ Iohannes Indagine in his Booke

A. iij.

A prognosticacion.

Of the foure quarters of this
yere. 1562. and first of the
Winter.

The winter began, the yere of our
Lorde. 1561. at what time the sunne
entred into the first minute of Capri-
corn, which was the xii. day of De-
cember, at vi. of the clocke in the morning,
the Moone beyng then in *Imo cali*, goyng in
the after noone to the fertile aspect of *Mercuri-
us*, and at midnight to the fertile of *Jupiter* &
trine aspect of *Venus*: the sunne also beyng
the next day at noone in full opposition with
Saturne. Considerynge all other thinges, I
perceave that the winter at the beginnyng
shal be very husked fast, with much alteracio
of weather, by the occasion of colde, snowe,
rayne, winde and tempest: the misdeall part
will be somewhat frostie, but most parte mo-
derately colde, and naturall weather, the end
is like to be windy, and most parte drie.

Of the spring and beginnyng of
this yere. 1562. In the which I intende
to declare partely the disposition
of the whole yere.

The

A. Prognosticacion.

In the spring time beginneth this yere the .xi. day of Marche, at one of the clocke .xiii. minutes after noone: at what time the sunne entreth into Aries, in the beginning of the .x. house astronomical. The Moone is in the .xii. house beholding Venus with a quarele aspect. I iudge that this quarter, as touching the weather, shalbe at the beginning windie, moiste, and variable, and inclined rather to colde then heate: at the middest temperate and moiste: and at the ende likewise temperate with raine diuers times.

In the reuolucion of this yere, & chiefly of this quarter, I take Sol to be the *Lorde cum Saturno particeps*, and Luna, *Domina ascendens*, Considering the influence and consellation of the starres and planetes, that appereth in this reuolucion: I finde that all thinges this yere shall haue meetely good successe, and yet not without some binderauntee and calamitie, by reason of Saturne beinge in the .xii. house, where his most delight is to be, nie the ascendent, and almoſte ioyned vnto the Moone. Also the Eclipse of the Moone will cause some hurt and dammage, as I will declare in a chapter by it self.

The

A. Prognosticacion.

The Doone being infortunate in the xii. house in Gemini (in which signe she is voyde of all dignities) commyng to a coniunction with Saturne, signifieth much sorow & trouble to the common people by reason of hatred, discorde, deceite, and bewreyng one another. Also is signified ex Saturni situ, diseases colde and drie, much colde & cloudy weather. Thunder and lightnyng, and hurte to the blossomes of trees, and that many shalbe taken and fall into their enemies handes, & be put in prison.

The sunne and Iupiter wolde haue caused much good and prosperite this yere amonge the people, if sanguinolēt Mars had not lodged in my Lady Venus house with Iupiter for Mars is unto Iupiter a mortall enemye, he wil therefore greatly hinder the good influence of Iupiter.

Attamen, Sol qui adest dominus anni et in domo decima fortunatus ac bene dispositus, Regina sublimitatem, exaltationem, gloriam et pietatem designat, et quod sollicitabunt circa regni sui augmentationem et profectum. Et quod quilibet pro rebus statum suum auget cum utilitate, prosperitatem etiam significat dignitatem, magnitatem atq; nobilitatem.

Venus being in the ix. house in Discrene
her

A Prognostication.

ber exaltacion signifieth mortalitie in the southe pannes: and that good store of fische shall be taken.

¶ Therefore let vs make our most humble prayers with true penitent hartes vnto almighty God, whiche is ruler of heauen and earth and of all thinges contained in them, that he will so rule the planets and sterres (whiche be his instrumentes) to our conforzte and preservation, that we may praise him alwaies and geue him thanks, and take all thinges wel a worthe, and say: O father thy will be done in earth, as it is in heauen, for thou workest all thinges in them that loue thee for the best, *In xra illud Pauli ad Rom. 8.*

Diligentibus deum omnia cooperantur in bonum.

¶ Of the Summer.

Summer beginneth the xii. daye of June, at one of the clocke. xxi. minutes after noone, for then the sunne entreteth into the first minute of Cancer beyng placed in the .ix. house with Saturne and Venus, all thre of them beholding the Moone (beinge in the ascendent in the second degree of Scorpius) with a trine aspect, Iupiter is in coniunctio with Mercuri in

the

A. v.

the

A Prognostication.

the .xvii. degree of Gemini.

I take *Mercurie* to be Lord of the Revolution of this quarter, and *Mars* to be lord of the ascendent: whereby I iudge that this quarter shall be verie windy and moiste, at the beginning, the middle part to be moiste part drie, and the latter ende to be temperat. I iudge also, that there shall happen some hurte and damage, to the roynes and fruites of the yearth.

Of the eclipse of the Moone in this yere, M. D. LXX.

There shall be this yere a marvellous greate Eclipse of the Moone, the .xvi. daie of Julie, at three of the clocke. xl. minutes in the morning.

I finde by the figure of this eclipse, that there shall be abundance of waters, raine, wormes, and vermine of the yearth. And is like to be divers diseases, in the parties beyonde the sea: it shall be dangerous going by water. This Eclipse shall take mooste his effect in the colde, fine, and fire climate, and shall dure about a fire weekes.

Of Autumne, other waies called, the fall of the water.

Autumne

A Prognostication.

Altime hath his beginnyng, at what tyme the sunne shall entre, into the first minute of the first degree of *Libri* whiche is this yere, the. xliij. daie of September, at two of the clocke in the morning. The moone being in the. xv. degree of *Aries* in *mansione temperata*, hauing a quartile aspect to *Saturne*, beyng in the. xviij. degree of *Cancer*. I gather that the weather shall be this quarter, inclined to raine, and moderate cold, at the beginnyng, and middle part and towarde the ende shall be colde, stormie winde, with raine, and some snowe.

Of the diseases of this yere.

Inde that *Saturne* this yere, shalbe the chief causer of diseases, in the fall of the leafe and Winter. Also *Mars* beyng Lord of the first house, in the revolution of the Sommer quarter, will cause certain hotte diseases, in the middes and ende of Sommer.

The diseases of the winter shal procede of muche colde and rawe humours, and of corrupt blood, as coughes, reumes, poses, toothache, hedache, goutes, paine in the legges & knees, Collicke passion, catharres fallynge from the head into the Lungen, as phtisis,
and

A prognostication.

and asthma, palseis, swellinges, sores, and inflammations in certaine partes of the bodie, Quotidianis, Quartaines, paine in the backe, Strangurie, paine of the Stone, & Drop-sies: and to the aforesaid diseases shall old folkes and legmaticke persons be most subiect. In the spring time, will raigne most part of the saide diseases, with blcers, scabbes, fluxes, squinancie, pleuresie, pimples in the face, itching, small Pores, & Weasels, muche bleeding and suche like.

In the sommer quarter shall raigne hotte Agues, as Tertians simple and double, Febres continua, synochi putrida, sweatinge paine in the head, stomacke, eyes, eares, & mouth.

In the fall of the lease will moste abunde, diseases proceeding of burned chollar, blood, and Melancholie, as quartens, opilation of the Splene, Emicroides, Caneres, sebzes, Hectica, Mania, Cardiacapassio, and diseases proceeding of moche sorowe and thought.

Of plentie and scarcitie of
vituallcs in this yere.

Considering the nature of the Planetes, in the reuolutions of the folwer quarters of this yere. I finde that the yere shalbe indifferent good and fruitfull

A Prognostication.

full, except that *Saturne* shall cause damage to the trees, in the tyme of their blosomes. Also Grasse and other growyng thinges, shall bee somewhat hindered, by oust moche raine, water, and stormie weather.

All kinde of coyne shall be plentie enough and be at a meane price, excepte that Warlike shall be somewhat endamaged, thzough cold and moche weate weather: frutes shall not haue their full and perfite growth, by reason of stormes, and greate blastes of windes, therfoze there shall be of them no great store.

Also of Beanes and Peason, shall not bee so good store this yere, as was the last: wine Grapes, shall haue a reasonable good successe, but nothyng so good, as they had the last yere.

Butter, Chese, Milke, Oyle, and Honie, shall not be verie plentie, and therfoze shall be solde somewhat dere: vntill the begynnyng of Sommer, and then after shall be sold better cheape. Diuers kindes of beastes, as many horse, shepe, Deare, and sothe like, as like to perishe. But of fishe there is like to bee good store, and shall bee sold good cheape, fleshe shall be at an indifferent price.

COf peace and warre.

A Prognostication.

I Can not perceave but that this yere
is like to be passed over with peace
and quietnesse, in this our region,
thzough the meanes and help of the
good beneuolent planet *Iupiter*, & the greate
power and dominion of the regal planet the
Sunne, which is chiefest Lord and ruler, as
well of the firste parte of the yere, as of the
Eclipse.

In the reuolucion of the seconde parte of
the yere, *Mars est in casu suo*, and at the time
of the Eclipse, he is in *Facie ac triplicitate Iouis*.
Wherefoze all other thinges well consi-
dered, I iudge that with the grace of Al-
mightie God (notwithstanding the greate
coniunction of the said *Mars* and *Saturne*) we
shall passe over this yere quietly and liue in
peace without any commotion, or disturba-
ce of marciall affaires. Whiche thing with all
other thinges necessarie, bothe for our bo-
dies and soules, I besech the father of heuen
to graunte vs thzough his only sonne *Iesus*
Christ our Lord. Amen.

¶ God saue the Queene.

A Prognosticacion.

A brief note and collection of the
most dangerous, and most infortunate
daies, to take any disease in, or to
enterpise any greate mat-
ter, for this yere
